**Prof. Günter Blöschl** TU Vienna

**Dr. José Luis Salinas** Moody's RMS, London, UK

Prof. Gregor Laaha BOKU Vienna

6

Vienna

**Prof. Attilio Castellarin** University of Bologna

**Prof. Alberto Viglione** Polytechnic University of Turin

Vienna University of Technology, 1040 Wien, Karlsplatz 13/222 www.waterresources.at

#### Overview

This Summer School is devoted to runoff prediction in ungauged basins (PUB), i.e., predicting water runoff at locations where no runoff data are available. This lack of data presents considerable challenges to catchment managers who require information on water flows for decision making. This course, based on the book, "Runoff Prediction in Ungauged Basins: Synthesis across Processes, Places and Scales", will provide hydrologists with the theory and methods to address this critical challenge. The collection of speakers will bring together results from individual location-based studies and show how a comparative approach can be applied to learn from the differences and similarities between catchments around the world along gradients of climate and landscape features.

#### Who should attend

Masters and PhD students researching catchment hydrology and practising hydrologists who are challenged by making predictions in the absence of runoff data.

## What to bring

The course includes a substantial hands on component. Participants can bring their own runoff data (from around 10 catchments, over 10 years) or alternatively, runoff data will be provided.

### Venue

The course will be held at the Vienna University of Technology, Karlsplatz 13, in the heart of the Austrian capital.

## Registration

The course fee is Euro 600-.
Included are all course material and lunch.
Participants are responsible for their own

transport, accommodation, health insurance, all other meals and personal expenses.

A small number of competitively selected, fee waiver places are available. To apply, send a CV and motivation letter to Dr. Borbála Széles (details below) by 1st May, 2024.

To register and for any enquiries contact: Dr. Borbála Széles

# Programme

Friday	Hands-on (Comparative analysis)	Hands-on (Group work)	Hands-on (Group presentations)	Synthesis and feedback Blöschl, Sivapalan
Thursday	Low flows Laaha	Hands-on (Regression)	Runoff hydrographs Parajka	Hands-on (HBV, signatures)
Wednesday	<b>Floods</b> Salinas	Hands-on (Index-flood)	Hands-on (Group work)	Hands-on (Group work)
Tuesday	Seasonal runoff Sivapalan, Viglione	Hands-on (Budyko and Parde)	Flow duration curves (FDCs)	Hands-on (Construction and prediction of FDCs)
Monday	Introduction Blöschl	Remote sensing Parajka	R for PUB Viglione	Annual runoff Viglione
	9:00-	11:00-	14:00- 15:30	16:00- 18:00
